Firm Philosophy & Objectives

Gerber Architecture is a full service architectural firm focused on high-end custom residential design. We take pride in developing designs that reflect each client's unique style and creating spaces that are both aesthetic and functional.

Residential remodel and addition projects are designed to reflect and enhance the existing home and create the idea that the new project has always been a part of the original house. New houses are designed to reflect the lifestyle of the client and maintain the integrity of the neighborhood and adjacent environment.
